

EL CENTRO POLIVALENT

This is a block-built building in grey and cream, on the left about 100m from the town sign for Murla, when coming up from the CV715.

There is parking at the side of the building, and a new underground carpark is being built beneath it. About 50m away is a car park for some 30 cars, and there is another car park about five minutes walk away, but it is slightly uphill.

The Guardia Civil may tow away any cars that are left parked on the main road, CV719.
